GREY COTTONS,

We would ask the attention of Purchasers to
the Grey Cottons we are now making.

WEATHER GUIDE.

The following Table (the result of many years' actual observation) is ascribed to Dr. Herschel. It is constructed upon a due consideration of the attraction of the Sun and Moon in their several positions respecting the Earth, and serves to show what kind of weather will most probably follow the entrance of the Moon into any of her quarters:—

Moon.	Time of Change.	In Summer.	In Winter.
If New Moon, First Quarter, Full Moon, or Last Quarter, happens.	Between midnight and 2 in the morning.	Fair.	Hard Frost unless wind be S. or W.
	Between 2 and 4 morn.	Cold with showers.	Snow & stormy.
	" 4 and 6 "	Rain.	Stormy & rainy.
	" 6 and 8 "	Wind and rain.	Stormy.
	" 8 and 10 "	Variable.	Rain if wind W. Snow if E.
	" 10 and 12 "	Showery.	Cold and high wind.
	At 12 Noon, and to 2 in the afternoon.	Very rainy.	Snow or rain.
	Between 2 and 4 after.	Variable.	Fair and mild.
	" 4 and 6 "	Fair.	Fair.
	" 6 and 8 "	Fair if wind be N. W. Rainy if S. or S. W.	Frosty if wind N. or N.E. Snow if S. or S.W.
	" 8 and 10 "	Ditto.	Ditto.
	" 10 and midnight.	Fair.	Fair and frosty.

The nearer midnight any of the Moon's changes occur, the finer will be the weather during the succeeding week; the nearer noon any of those changes happen, the more foul and wet will be the weather that will follow.

EAGAR'S Peruvian Bitters produce Health, Strength and Vigor. See page 287.

In Nova Scotia farming is yearly becoming more systematic and scientific. Like any other business, it requires system in the ordering of operations, and scientific knowledge and practical skill for their correct performance. Any strong workman can plough, and sow, and reap, and feed cattle, and carry produce to market. But it requires a trained mind to direct the ploughing, and sowing, and reaping, so that there may be an outcome of profit. The reason why farming was long regarded as unprofitable in Nova Scotia was not that the soil was naturally poor, or the climate bad, but that the cultivation was slovenly from want of intellectual stimulus.

EAGAR'S Peruvian Bitters, cure Debility, Weakness, &c.

Of late years much improvement has taken place. Attention is now given to selecting the most suitable improved varieties of the various crops, such as Potatoes, Barley, Wheat, Peas, Forage Plants, &c., of which many new kinds have been introduced of late years by the Board of Agriculture. The breed of cattle, sheep and pigs is now thought worthy of serious attention, and the importations of thorough-bred Stock made by the Board from year to year have served to "educate up" our farmers to look upon two or three hundred dollars as a very ordinary price to pay for a good bull. The improved seed and improved stock (being of greater value than the old) have led to greater care in cultivating and manuring the soil, and the application of machinery to the securing of crops has done away with the annual losses from bad weather.

EAGAR'S Odontine Ess-nce relieves Toothache and forms a Stopping. See page 237.

This is the trying month for cattle. The severe cold tells upon the animals, and is apt also to freeze the energies of those who attend upon them. See that wells and watering places are kept open; nothing is so injurious to cattle as want of water, especially when they have nothing but dry feed. At this season serve out the best hay, and give some roots and grain to all stock for which they can be spared. Where roots have not been grown, it is well to consider whether the stock of animals should not be reduced before wintering time; but it is too late to think of that now, for nobody will buy poor cattle at this time of

year, and it will therefore be profitable to purchase grain for your stock. Nothing is so unprofitable as to starve stock.

So soon as the snow is deep enough sleighing operations should begin. Bring home from the woods the fuel that has been chopped, and deposit it in orderly piles in the back yard or close to the wood house. During wet and snowy weather it can be cut under cover, and will thus supply work for unfavorable days that would otherwise be lost. Haul fence poles to the lines where they are to be used on the opening of spring.

EXOTIC EXTRACT removes Tan, Sun Burn and Freckles, and makes the Skin beautiful. Sold by M. F. EAGAR, Halifax.

ALSYKE CLOVER is a forage plant which has not yet risen to its proper place in Nova Scotia, although its culture is being extended year by year. It is a tall slender clover, considerably longer in the stem than red clover, it produces more hay, dries perfectly green, and is well liked by animals. It so completely covers the ground that weeds are killed out wherever it grows. In wet lands where red clover gets winter killed, the Alsyke grows most luxuriantly, not suffering during the severest winters. It may be sown upon the grass land, where the sod

is not too close, any time during the spring or early summer. In seed-
ing down land, always sow the clovers in spring time if possible, so as
to give a strong root for the first winter.

In March see that all your farm implements are repaired, so as to be
ready for spring work. Make definite plans and calculations as to the
crops to be put in, see that you have manure enough at hand for them,
and lay in your supplies of seed, so as not to have to run to town and
buy the first bad seed you can get, while your men are waiting in the
field to sow it. Make up a hot-bed for cabbages, celery, salads, and such
flowers as are required to furnish the beds in front of the windows.

It is only in favourable seasons that much field work can be accomplished in April, yet every preparation should be completed, so that when the frost leaves the ground and dry weather comes, a beginning may be made. On land prepared in the Fall, early potatoes and peas may be sown a fortnight or three weeks earlier than on land that has still to be ploughed. In the garden, select a dry, warm sunny exposure for early vegetables. Peas, parsnips, onions and carrots may be sown as early as it is possible to make a drill. Early potatoes should also be put in for summer use. It is too early to sow salads, &c.

In the orchard and small fruit garden, much useful work may be done this month, such as digging and clearing away the roots, pruning the branches, cutting out dead wood, and applying manure, if this last was not done in the Fall. Every favourable opportunity should be taken to clear up grass fields and shrubberies, repairing roads about the farm, clearing up the barn yard, &c. There is in fact so much to be done now that the farmer will hardly have time to look into the Almanack, yet his doing so will sometimes remind him of the right things to be done at the right times, which are apt to escape even the best of memories.

EAGAR'S PERUVIAN BITTERS are recommended by gentlemen of the highest standing, socially and scientifically.

This is the farmer's busy month, and the success of his crops will depend much upon his assiduity at this season. If a good farmer, his ploughing has been mostly done in the Fall; his grass-lands were top-dressed then; his implements have been repaired and put in order during the winter, and now he is ready to enter vigorously upon the work of the growing season. As soon as the land can be worked, such crops as potatoes, oats, wheat, barley, peas, horse beans and clover

should be sown. Early frost will not injure any of these. But bush beans, indian corn, squashes, cucumbers and pole beans require to be sown about the end of May or beginning of June, after the ground has become dry and warm.

In order to economise time, arrange all the men's work for them the day before, and in the evening tell them what you want them to do the next day, so that their tools, clothing, &c., may be suitable for the work. Take the first rainy day in May to clean out the cellar, and, after the bulk of the seed is in the ground, take the first bright sunny day to whitewash the outhouses and fences.

EAGAR'S CHOLERA MIXTURE cures Diarrhea, Cramps, Dysentery, and all Summer Complaints.

JUNE is turnip month, and we wish this crop were more generally cultivated, as, in suitable soils, the yield is enormous. The soil requires to be made very fine by ploughings, rolling, harrowing, &c., and the manure applied should be well-rotted. The best of all manure for turnips is bone dust or superphosphate of lime; even half-inch bones have a wonderful effect upon this crop, where farm yard manure has been ploughed in. Swedish Turnips are best adapted to the circumstances of Nova Scotia: they may be sown earlier than the other kinds, they may be transplanted like cabbages, they are not so liable to suffer from frost as the softer sorts, and they keep much better during the winter. They are besides much

more nutritious for stock, and give a larger supply of winter food for the same extent of storage, which is here a considerable item. The sowing of white and yellow turnips (as distinguished from Swedes) may be profitably delayed till July, and when the turnip land happens not to be got ready by the end of June, or beginning of July, it is better in ordinary seasons to sow the soft kinds. Yet in some seasons the Swedes will succeed well and grow large even when sown late in July. When the fly eats away the young turnips as fast as they come up, draw a light harrow over the drills and sow again; probably the fly will have gone by the time the second sowing comes up. At any rate do not be contented with a poor crop, merely because it will save a pound or two of seed and a little trouble.

POTATOES and other root crops require much attention this month; hoeing, cultivating and drilling should be constantly going on until the drill husbandry fields, and the garden as well, are perfectly clear of weeds and in good order in every respect. If any of this kind of work should be left incomplete at the end of July, it is likely that the crop will be sacrificed, for haying time occupies all the physical energy of the farm, and the constant attention of the farmer. Whilst the hoeings and ploughings are going on, see that your Mowing Machine is in good order, that your tackle is strong, that your horses are in good condition

See also to your Horse Rakes, Hand Rakes, and Pitching Forks; and, if your men drink molasses and ginger in their water during haying time, see that you have a supply on hand. Give them a large tin milk pail and a tin drinking cup; these will neither crack in the sun like a wooden pail, nor be liable to the breakage of crockery. Let everything required be taken to the field in the morning, so that men may not require to be running home every half-hour for something wanted. In haying, as in other kinds of pressing work, system will often be worth an extra able bodied hand.

In the Almanack for 1873 we gave a recommendation in reference to seeding down grass lands, which we consider very important. It is being acted upon in some parts of the Province to a limited extent; but, as we hope it will be more extensively followed, we repeat the paragraph:—Hay being by far the most important crop produced in Nova Scotia, the operation of seeding down land to grass is entitled to much attention. In the past the common method has been to sow grass seed with barley or oats or wheat in Spring, and to look for a hay crop in the year following. The disadvantages of this plan are (1) that if the grain grows well, the grass plant will be partially smothered; (2) if the land is not very clean there will be an

abundant crop of weeds and browntop in the grass; and (8) by the time two or three crops of hay have been obtained, the land begins to show signs of running out. To overcome these disadvantages, it is now customary in some localities to prepare the land and sow the grass seed in August or September. By this method a full crop is obtained during the following summer. Potato land may be treated in this way as soon as the potatoes are taken up. Old grass land that requires renewing may be merely ploughed, harrowed, topdressed with manure and sown with timothy. Clover seed should never be sown in the Fall, but may be scattered over the fields in Spring time.

EAGAR'S Peruvian Bitters give tone and Appetite.

See page 287.

THE Hay Harvest is now completed, and the Grain Harvest commenced. There are also other crops to be secured. Potatoes may be taken up as soon as ripe, that is when the haulm, or stalks, have matured and browned or blackened. It is not necessary to wait until they are entirely withered away. Do not be in too great a hurry to throw your potatoes into large heaps; a dry, airy day will do as much to ripen potatoes as to make hay, if they are left loosely on the field; but, if left long in sunlight, they become green and nauseous and poisonous. Carefully pick out all faulty potatoes before storing away; they should be stored in a dark cellar, but with free

admission of air, so long as the temperature does not fall too low. After potato time, the mangel wurtzel has to be taken up, and then carrots and turnips; parsnips also, if required for winter use. All roots when taken up are partially cut or wounded, and, if thrown together in heaps before the surface has time to dry, the wounded spots begin to decay and enlarge, and the ultimate result is the entire destruction of the crop. People are continually complaining of their roots rotting, and yet continue the very methods calculated to set up putrefactive action in their winter stores. Let every root be dry on the surface before storing it away or allowing it to come into contact with another.

SWEDISH TURNIPS have usually to be taken up this month; they should never be raised until we have had a slight frost, followed by wet weather, which causes the roots to swell very rapidly. Be careful to let the cut surface left by removal of roots and tops to become dried over as it were, before storing away the bulbs. Parsnips may be taken up any time before severe frost, or they may be allowed to remain in ground all Winter, for use in Spring. It is time now to mulch all

fruit trees and bushes, and to protect tender things. Raspberries and
Roses may be pegged down to the ground, which affords an effectual
protection, as they are then sheltered from the drying frosty winds, and
have in winter a covering of snow; but the more tender kinds of Roses
and other delicate plants had better have a sheltering mulch, or mats
or boards, put around them; this can easily be done after the shoots
are pegged down to the ground.

EAGAR'S Dentifrice is the best Tooth Powder known.

THE sales of Imported Stock by the Board of Agriculture usually take place this month. Our farmers are now pretty well acquainted with the peculiarities of different breeds. The short horn Durhams are especially adapted for beef cattle; they grow very speedily to very large size, and the meat is excellent. Ayrshires afford a very large supply of milk, and are therefore preferred by milkmen and cheese manufacturers. Devons are hardy and active, do on rough pasture, make good, quick oxen, and yield "Devonshire" cream; they are graceful and uniform in colour, a deep red. Alderneys or Jerseys are very domestic,

do not like the woods or wild pastures, but stay about the back-yards of city residences, feed on slops, and give the richest milk, the richest cream, and the most golden butter. Each one to her taste, as the old woman said when she kissed her cow. Cheese Factories are now in successful operation in several districts of Nova Scotia, and their extension is much to be desired, because they lighten very much the labour of the farmer's family, enable a better article of cheese to be produced than can be made on the farm, and bring a larger return for the milk used in the manufacture. The present month is a good time to begin a Cheese Company.

DIVISION OF PROFITS. 1870.

Comparative Table, showing the Profits to Policy-holders, on Policies 5 years in force, payable either in Cash or in diminution of premiums for the next five years as compared with the annual premium.

AGE.	PREMIUM.	PROFITS.	
	Annual Rate.	Cash.	Annual Reduction.
21	\$16.80	\$25.44	\$5.90
25	19.00	27.95	6.00
30	22.30	31.41	7.47

40	30.50	39.34	9.45
45	35.90	43.76	10.54

EXAMPLES.

"CASH" PROFITS.

I.—The holder of a policy for \$4000 of five years' standing, commencing at age 30, received as his share \$136.64; not only paying his year's premium, amounting to \$89.20, but leaving him a surplus in cash of \$47.44, or about 53 per cent. over and above a full year's payment.

REDUCTION OF PREMIUMS.

II.—The holder of a policy for \$5000 of five years' standing, commencing at age 30 became entitled during the next five years to an annual diminution of his premium to the extent of \$40.05. Thus.—From his annual premium, \$111.50, the deduction was \$40.05, reducing his payment to \$71.45, or two-thirds his original premium. At the next division in 1875, a further allotment of profits will be made.

BONUS ADDITION.

III.—A bonus has been added to all Whole Life Policies, whose holders take their profits in this mode, at the rate of \$25 per \$1000 for every year the Policy has run since last division, in addition to all previously declared bonuses. Thus the addition to policies dated prior to 30th April,

1866,	} is,—for each \$1000, {	\$125.00
1867,		100.00
1868,		75.00
1869,		50.00
1870,		25.00

N.B.—These results have been accomplished, after making ample provision for all the liabilities of the Company, notwithstanding the economical rates of premiums charged by the Canada Life, giving a present and continued assurance, larger in amount for a given premium than other offices.

Attention is called to the fact that the Cash Bonus returnable to policy-holders of 5 years' standing, is equal to from 20 to 50 per cent. in EXCESS OF A YEAR'S PREMIUM, in other words, these policy-holders will not only have NOTHING TO PAY THIS YEAR, but will be MONEY IN HAND BESIDES.

BELCHER'S ALMANACK being "the true guide board" for Farmers, Fishermen and the public in general,

WOOLRICH

again takes his usual place in this well compiled work, in order to advertise his business in general, but more especially to call the attention of Nova Scotians, &c., to the following list of

STANDARD PREPARATIONS,

many of which have stood the test of time and use for the past thirteen years—and are each day becoming better and more favorably known.

DR. RIDGE'S FOOD

Is acknowledged all over Europe and this Continent to be the ONLY suitable Food for INFANTS and INVALIDS.

WOOLRICH'S ARABIAN SPICE,

(The original article of its kind), extensively used and approved of in Nova Scotia and the United States of America, for preserving good health and prime condition in

Horses, Cattle, Sheep, Pigs and Poultry, &c.

Remember it is a highly concentrated preparation, not made up in bulk with Shorts or Cornmeal, and THE DOSE IS ONE Tablespoonful (not three or four), consequently it is at least from 50 to 75 per cent cheaper than any article of the kind. (Please bear this in mind.)

WOOLRICH'S PICK-ME-UP BITTERS

Are a Tonic of true merit, and will cure Dyspepsia, Indigestion, Loss of Appetite, Heartburn, and Gloominess of mind.

UNCLE JOHN'S PILLS

Should be in every house, as they are the best family medicine in use. (They work like a charm.)

WOOLRICH'S BLOOD PURIFIER,

Of known composition, will cleanse the Blood from all impurities, removing Blotches, Pimples, Boils, Scrofula, and all diseases of the skin, &c.

(a) The Population of Quebec is given in the Census Report of 1861 at the figure of 51,109, but this comes from the fact that a part of the population of the electoral district of the City of Quebec was enumerated as part of the population of the County of Quebec, to which it did not and does not actually belong.

(b) The decrease indicated is, in fact, only apparent. At the time of the taking of the census in 1861, Quebec and Kingston, with Montreal and Halifax, were the four most important military stations in Canada, and had comparatively large garrisons, the whole personnel of which was included as forming part of the population of these cities. In 1871 these garrisons had been withdrawn, and the few soldiery still remaining have not been counted, not being part of the domiciliated population of the localities from which they were about to depart. The increase of the population of the cities of Montreal, Toronto, Halifax, St. John, N. B., and Fredericton is also larger than apparent, for the same reason. It is again to be remarked, in relation to the comparative figures of Quebec, that this city was in 1861 the seat of the Government of Canada, and that the loss entailed by its removal to Ottawa has been only partially supplemented by it becoming the site of the Provincial Government of Quebec.

MARGESON'S CALCULIFUGE

CURES

**Gravel, Stone in the Bladder, Dropsy,
and all Diseases of the Kidneys,**

DIRECTIONS.—One wineglassful in as much water, each morning, noon and night.

In all ordinary cases one bottle is sufficient, except for a beast, when two or three may be required.

The Proprietors can highly recommend this medicine, as it has been the means of curing over 200 persons before placing it on sale, where it now can be had for **\$1.50** per bottle. ADDRESS,

**R. C. MARGESON & CO.
HALIFAX, N. S.**

CERTIFICATES.

CHEZZETCOOK, March 3, 1873.

MESSRS. R. C. MARGESON & Co.—*Dear Sirs*; Please accept this testimony from one who has been suffering for upwards of five years from Gravel and Stone in the Bladder; and was advised by my friends to try your Calculifuge. I did so, and am happy to say that after using the two bottles you sent me last summer, it *entirely cured me*. I passed five stones the size of small peas, and upwards of a wine-glassful of smaller ones and gravel, and will send them to you by the first chance. I would advise all that are suffering with the same complaint, to secure your valuable medicine at once, as it has been the sole means of curing me. I will take pleasure in giving all the information I can to any that will call to see me at my house.

I remain yours,

ANDREW CRAWFORD.

HALIFAX, July 28th, 1873.

MESSRS. R. C. MARGESON & Co.—*Dear Sirs*: It is a pleasure to add my testimony to the virtues of your Medicine. My little daughter, three years old, was a great sufferer with Urinary Retention, sometimes four days at a time. Her sufferings were intense; all medicine failed to give her much if any relief. I procured a half-bottle Margeson's Calculifuge. After taking three doses, she got relieved, and is now as well as ever. This you can make known in the papers if you choose, as others may be afflicted in like manner.
